

#1	User Story Part I		User Story Part II Solution Criteria	
Role	As a Marketing team member,		Display real-time market trend data updated every 5 minutes	Integrate with external data feeds
Need	I want to track current market trends in the skincare industry on a real-time basis,		Provide a dashboard with visualizations accessible via the app	Allow export of trend data as CSV for on-demand reports
Value	so that I can adjust marketing strategies to capitalize on emerging opportunities.		Ensure <2s response time for trend updates	

#2	User Story Part I		User Story Part II Solution Criteria	
Role	As an AHI Customer,		Implement PCI-DSS-compliant invoicing with encrypted payment processing	Ensure no unauthorized access to payment data
Need	I want secure invoicing for my orders,		Provide a user-friendly invoicing interface within the app	Allow customers to view invoice history
Value	so that my payment information is protected and transactions are reliable.		Send email confirmation of invoice generation	

#3	User Story Part I		User Story Part II Solution Criteria	
Role	As a Finance team member,		Integrate PCI-DSS-compliance payment gateway for invoicing	Support batch processing for high-volume orders
Need	I want to enable secure order invoicing and processing,		Generate real-time transaction logs for Finance review	Pass QMP security testing with zero critical vulnerabilities
Value	so that customer transactions are secure and financial data is accurate.		Ensure 100% accuracy in invoice calculations	

#4	User Story Part I		User Story Part II Solution Criteria	
Role	As an AHI Leadership team member,		Provide a report identifying emerging markets based on real-time analytics	Ensure report generation in <5s with on-demand access
Need	I want to target and engage with emerging markets,		Allow segmentation by demographics, regions, and trends	Integrate with Marketing analytics
Value	so that AHI can expand its customer base and increase market share.		Enable push notifications for new market opportunities	

#5	User Story Part I		User Story Part II Solution Criteria	
Role	As an IT team member,		Ensure compatibility with new hardware	Maintain 99.9% uptime during operation
Need	I want the app to interface with new hardware and software,		Support integration with AHI's existing software	Document integration specifications
Value	so that it operates seamlessly within AHI's IT infrastructure.		Pass compatibility tests in Development phase
